Security Camera NVR INSTRUCTIONS
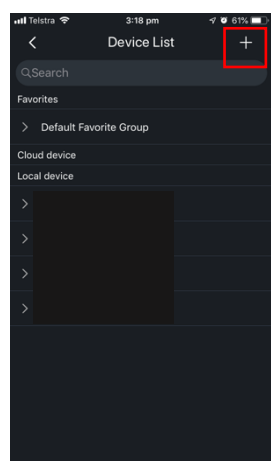

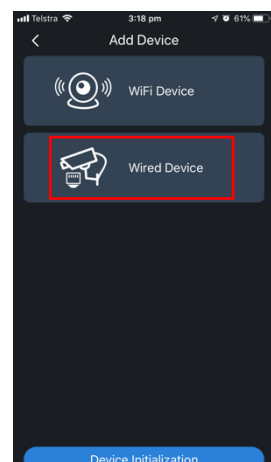

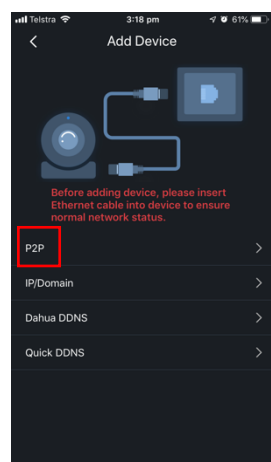

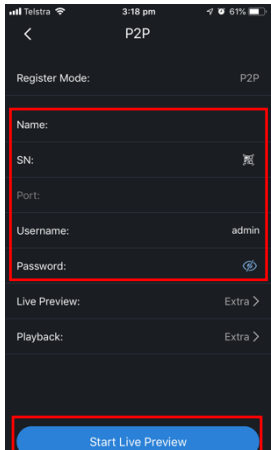

Your security cameras are connected to a network video recorder. This in turn is connected to the internet, allowing you to access the live or recorded images from any iOS device so long as you have internet access.

VIEWING LIVE CAMERA FEEDS

To view the cameras, you need to first download the IDMSS Plus app from the App store. Next, follow the setup procedure below. Once the initial setup is done, you can go directly to LIVE VIEW next time you use the app.
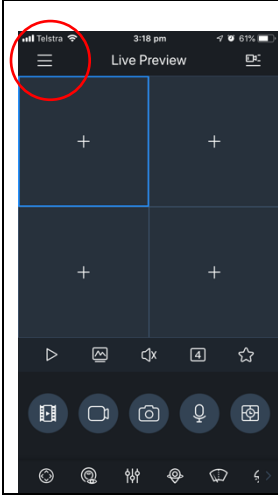

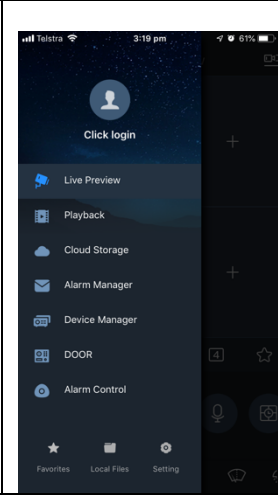

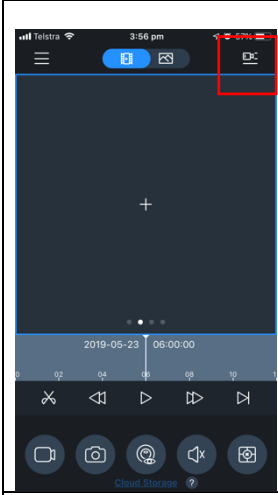

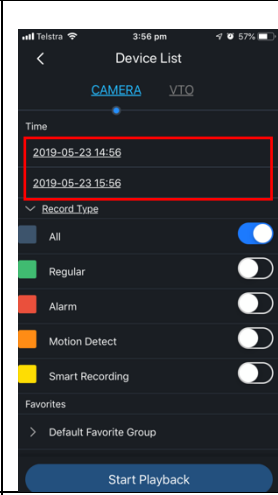

iDMSS Plus
ZHEJIANG DAHUA
TECHNOLOGY CO.,...
OPEN

Step 1
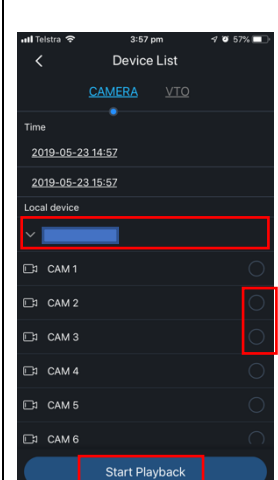

Run the iDMSS Plus app then click on the + symbol in the upper left quadrant to add your cameras

Step 2

Click the + symbol in the upper right corner to add a device

Step 3

Choose Wired Device

Step 4

Choose P2P

Step 5

Fill in the following details as provided by DLE for your specific cameras.

Name
Serial Number
Username
Password

Then press Start Live Preview at the bottom of the screen

Step 6

The live feed from your cameras will appear on screen.

Double tap a camera on the quad view to expand it to fill the screen. Double tap again to restore the quad view.

Swipe left or right to see any additional cameras not visible on the main quad view.

Best viewing is obtained by rotating your phone 90 degrees to landscape mode.

Security Camera NVR INSTRUCTIONS

VIEWING RECORDED FOOTAGE

First, follow the setup procedure on the reverse of this page to make your cameras available on your app. You only need to do this once.

Cameras are setup to record *only* when motion is detected, so you do not need to watch hours of footage should an incident occur.

Step 1 Run the iDMSS Plus app then click on the three-dash symbol in the upper left corner of the screen to access the menu	**Step 2** Click Playback
Step 3 Click the camera icon in the upper right corner to choose the cameras and timeframe to review	**Step 4** Set the start and finish times for the period you wish to review, then scroll down to choose which cameras to review Leave Record Type set to All
Step 5 Look under Local device for your site name (indicated here by a blue rectangle), then press the arrow to show the list of available cameras. Click the cameras you want to review, then press Start Playback.	**Step 6** The recorded images from your cameras will appear on screen. Double tap a camera on the quad view to expand it to fill the screen. Best viewing is obtained by rotating your phone 90 degrees to landscape mode. Additional options to pause, rewind, fast-forward, and save screen shots or video are shown at the bottom of the window.
