

Security Camera NVR INSTRUCTIONS

Your security cameras are connected to a network video recorder. This in turn is connected to the internet, allowing you to access the live or recorded images from any iOS device so long as you have internet access.

VIEWING LIVE CAMERA FEEDS

To view the cameras, you need to first download the iDMSS Plus app from the App store. Next, follow the setup procedure below. Once the initial setup is done, you can go directly to LIVE VIEW next time you use the app.

<p>The screenshot shows the Home screen of the iDMSS Plus app. At the top, there are icons for Live, Video, Picture, and Door. Below these are icons for Alarm and More. At the bottom, there are icons for Home, Device, Message, and Me. A red circle highlights a '+' icon in the top right corner.</p>	<p>Step 1</p> <p>Run the iDMSS Plus app then click on the [-] symbol in the upper right quadrant to add a device</p>	<p>The screenshot shows the 'Add Device' screen. It features a QR code scanner area and a 'Manually Enter SN' button at the bottom, which is circled in red.</p>	<p>Step 2</p> <p>Click "Manually Enter SN".</p>	<p>The screenshot shows the 'Add Device' screen with a 'Please enter device SN' field and a 'Next' button, both circled in red.</p>	<p>Step 3</p> <p>Type in the serial number of your device then press "Next".</p> <p>Your serial number is shown at the bottom of this page.</p>
<p>The screenshot shows the 'Add Device' screen with various device categories. The 'NVR' option is circled in red.</p>	<p>Step 4</p> <p>Choose <u>NVR</u></p>	<p>The screenshot shows the 'Add Device' screen with fields for SN, Device Name, Username, and Password. A 'Save' icon in the top right corner is circled in red.</p>	<p>Step 5</p> <p>Fill in the following details as provided by DLE for your specific cameras.</p> <p>Then press the "Save" icon in the upper right corner.</p>	<p>The screenshot shows the 'Default Page' screen with a 'Save' icon in the top right corner, circled in red.</p>	<p>Step 6</p> <p>On the next screen click the "Save" icon, again located in the upper right corner.</p> <p>Once you do this, your cameras will be displayed.</p>

The live feed from your cameras will appear on screen. Double tap a camera on the quad view to expand it to fill the screen. Double tap again to restore the quad view. Swipe left or right to see any additional cameras not visible on the main quad view. Best viewing is obtained by rotating your phone 90 degrees to landscape mode.

VIEWING RECORDED FOOTAGE

First, follow the setup procedure on the reverse of this page to make your cameras available on your app. You only need to do this once.

Cameras are setup to record *only* when motion is detected, so you do not need to watch hours of footage should an incident occur.

 <p>Step 1</p> <p>Run the iDMSS Plus app then click on the <u>Home symbol</u> in the upper left corner of the screen to access the Home menu</p>	 <p>Step 2</p> <p>Click <u>Video</u></p>
 <p>Step 3</p> <p>Click the <u>camera icon</u> in the upper right corner to choose the cameras and timeframe to review</p>	 <p>Step 4</p> <p>Set the <u>start and finish</u> times for the period you wish to review, then scroll down to choose which cameras to review</p> <p>Leave <u>Record Type</u> set to All</p>
 <p>Step 5</p> <p>Look for your site name (indicated here by a blue rectangle), then press the <u>arrow</u> to show the list of available cameras.</p> <p>Click the cameras you want to review, then press <u>Start Playback</u>.</p>	<p>Step 6</p> <p>The recorded images from your cameras will appear on screen.</p> <p>Double tap a camera on the quad view to expand it to fill the screen.</p> <p>Best viewing is obtained by rotating your phone 90 degrees to landscape mode.</p> <p>Additional options to pause, rewind, fast-forward, and save screen shots or video are shown at the bottom of the window.</p>
